Christian Academy Lakeland

1945 N Florida Ave, Lakeland, FL 33805

Academy to operate on the east annex building of Iglesia Casa de Amor Y Fe in Lakeland.

Important Data:

Grades: K-8

Number of students: Between 20 to 60

Observations: The building was previously approved and used as a school in the past. We understand that the codes and regulations may have changed, but the purpose is similar. We propose to use the first year data as a starting point to develop and understand demand. In reality, the Academy expects around than 20 students and use only the first floor in the first year. As soon as the demand grows, new infrastructure and possibly other modifications will have to be completed before allowing more than 60 students.

Number of Staff: 18

Students pickup/drop-off: 7:45-8:00 AM / 3:00 PM - All student “pick-up and drop-off” to be done on the Iglesia’s main lot.

Staff parking: All staff are to use the large parking lot south of Miami St.

School building exits: East exit will be used for the main “drop-off and pickup”.

South exit will be used for ADA and walking access.

North exit will be used for the parents parked in the north lot.

West exit and hallway that connects to the west queue area, for the higher grades 6-8th.

Existing speed limits: * Florida Ave: 30mph

* Swannanoa St: 20mph

* Miami St: 20mph

Concept plan – key points:

- 1) 95% of the paving on the concept plan is existing, with only some small areas to be patched to better accommodate traffic or more parking spaces.
- 2) If additional pervious areas are required, the lots around the Iglesia have plenty of space to remove old asphalt paving and switch to grass/landscaping. On the north side of the building, the asphalt is in very poor condition and will not be used for now, but it can be resurfaced in the future to provide more space for queuing, with

corresponding landscaping as well. The same applies to the gravel lot on the east side of the building.

- 3) The parking lot at South of Miami St is also owned by the Iglesia. Any other needs for pervious requirements may be planned for this area.
- 4) All the signs in the concept plan are subject to City/County Sheriff's review/authorization.

Applicant: Karma Consultancy LLC
KC No. 22-222

Dear Mr. Lyons,

Please accept the above-referenced application for the subject land parcel assemblage in support of the Providence Townhomes project, a proposed green, workforce-affordable, wellness residential townhome community located at 1250 Providence Road, Sanford, FL 34787.

EcoVision Homes LLC, supported by the Karma Group of Companies, is developing green, workforce-affordable, wellness residential communities in Florida. "Workforce-affordable" targets a middle-income price point as opposed to luxury or low-income price points. This multifaceted strategy is needed to address five crises in the United States and in so doing help more people achieve the American dream of homeownership. The crises, particularly exacerbated in workforce communities, are: (1) National deficit in affordable housing stock; (2) Lack of climate/weather resiliency; (3) Degradation in community/family/household cohesion; (4) Health/obesity-related disease; and, (5) Future of Work Upskilling. The strategy is based on the premise that affordability is a socio-economic issue not just a home price/rent issue and thus a multifaceted approach is needed.

While the above goals are noble, if this project is to ever have a chance of coming to fruition, then achieving sufficient unit density is imperative so as to help keep homes prices/rents as affordable as is possible. The following items are submitted as reasons in support for the applications:

- *PUD Request:* The assemblage is partially Future Land Use (FLU) designated and Zoned for low-density residential. The proposed PUD modification will incorporate the other parcels to allow for the development of a green workforce wellness residential community in this minority community while providing compatible roadway network connectivity, a neighborhood park, a community-focused neighborhood with courtyard-style townhomes and improved security features such as fencing and neighborhood watch/cameras.
- *Land Use Change Request:* This application request involves changing the FLU designation of three parcels (PIDs: 23-28-11-000000-021040, 23-28-12-047000-008003 and 23-28-11-000000-021190) from PUD industrial/Business Park to Residential Medium (RM). This change involves parcels that currently have no direct roadway access and therefore are not suitable for business uses. In addition, these parcels are adjacent to parcels FUL designated and Zoned for residential uses.

Conversations with the neighbors on 5th Street, 6th Street and 7th Street have been positive with additional neighborhood meetings planned. Also, conversations with CSX management have been positive and access to the cellphone tower and building lien required setback will be maintained.

- *Concept Plan Request:* The concept plan was discussed extensively with Mr. Matt Lyons so that sufficient roadway network connectivity, walkability, spillover parking, open space, etc. could be achieved. The building elevations and townhome type were also discussed extensively and a rear-loaded townhome concept that allowed for community courtyards was developed.

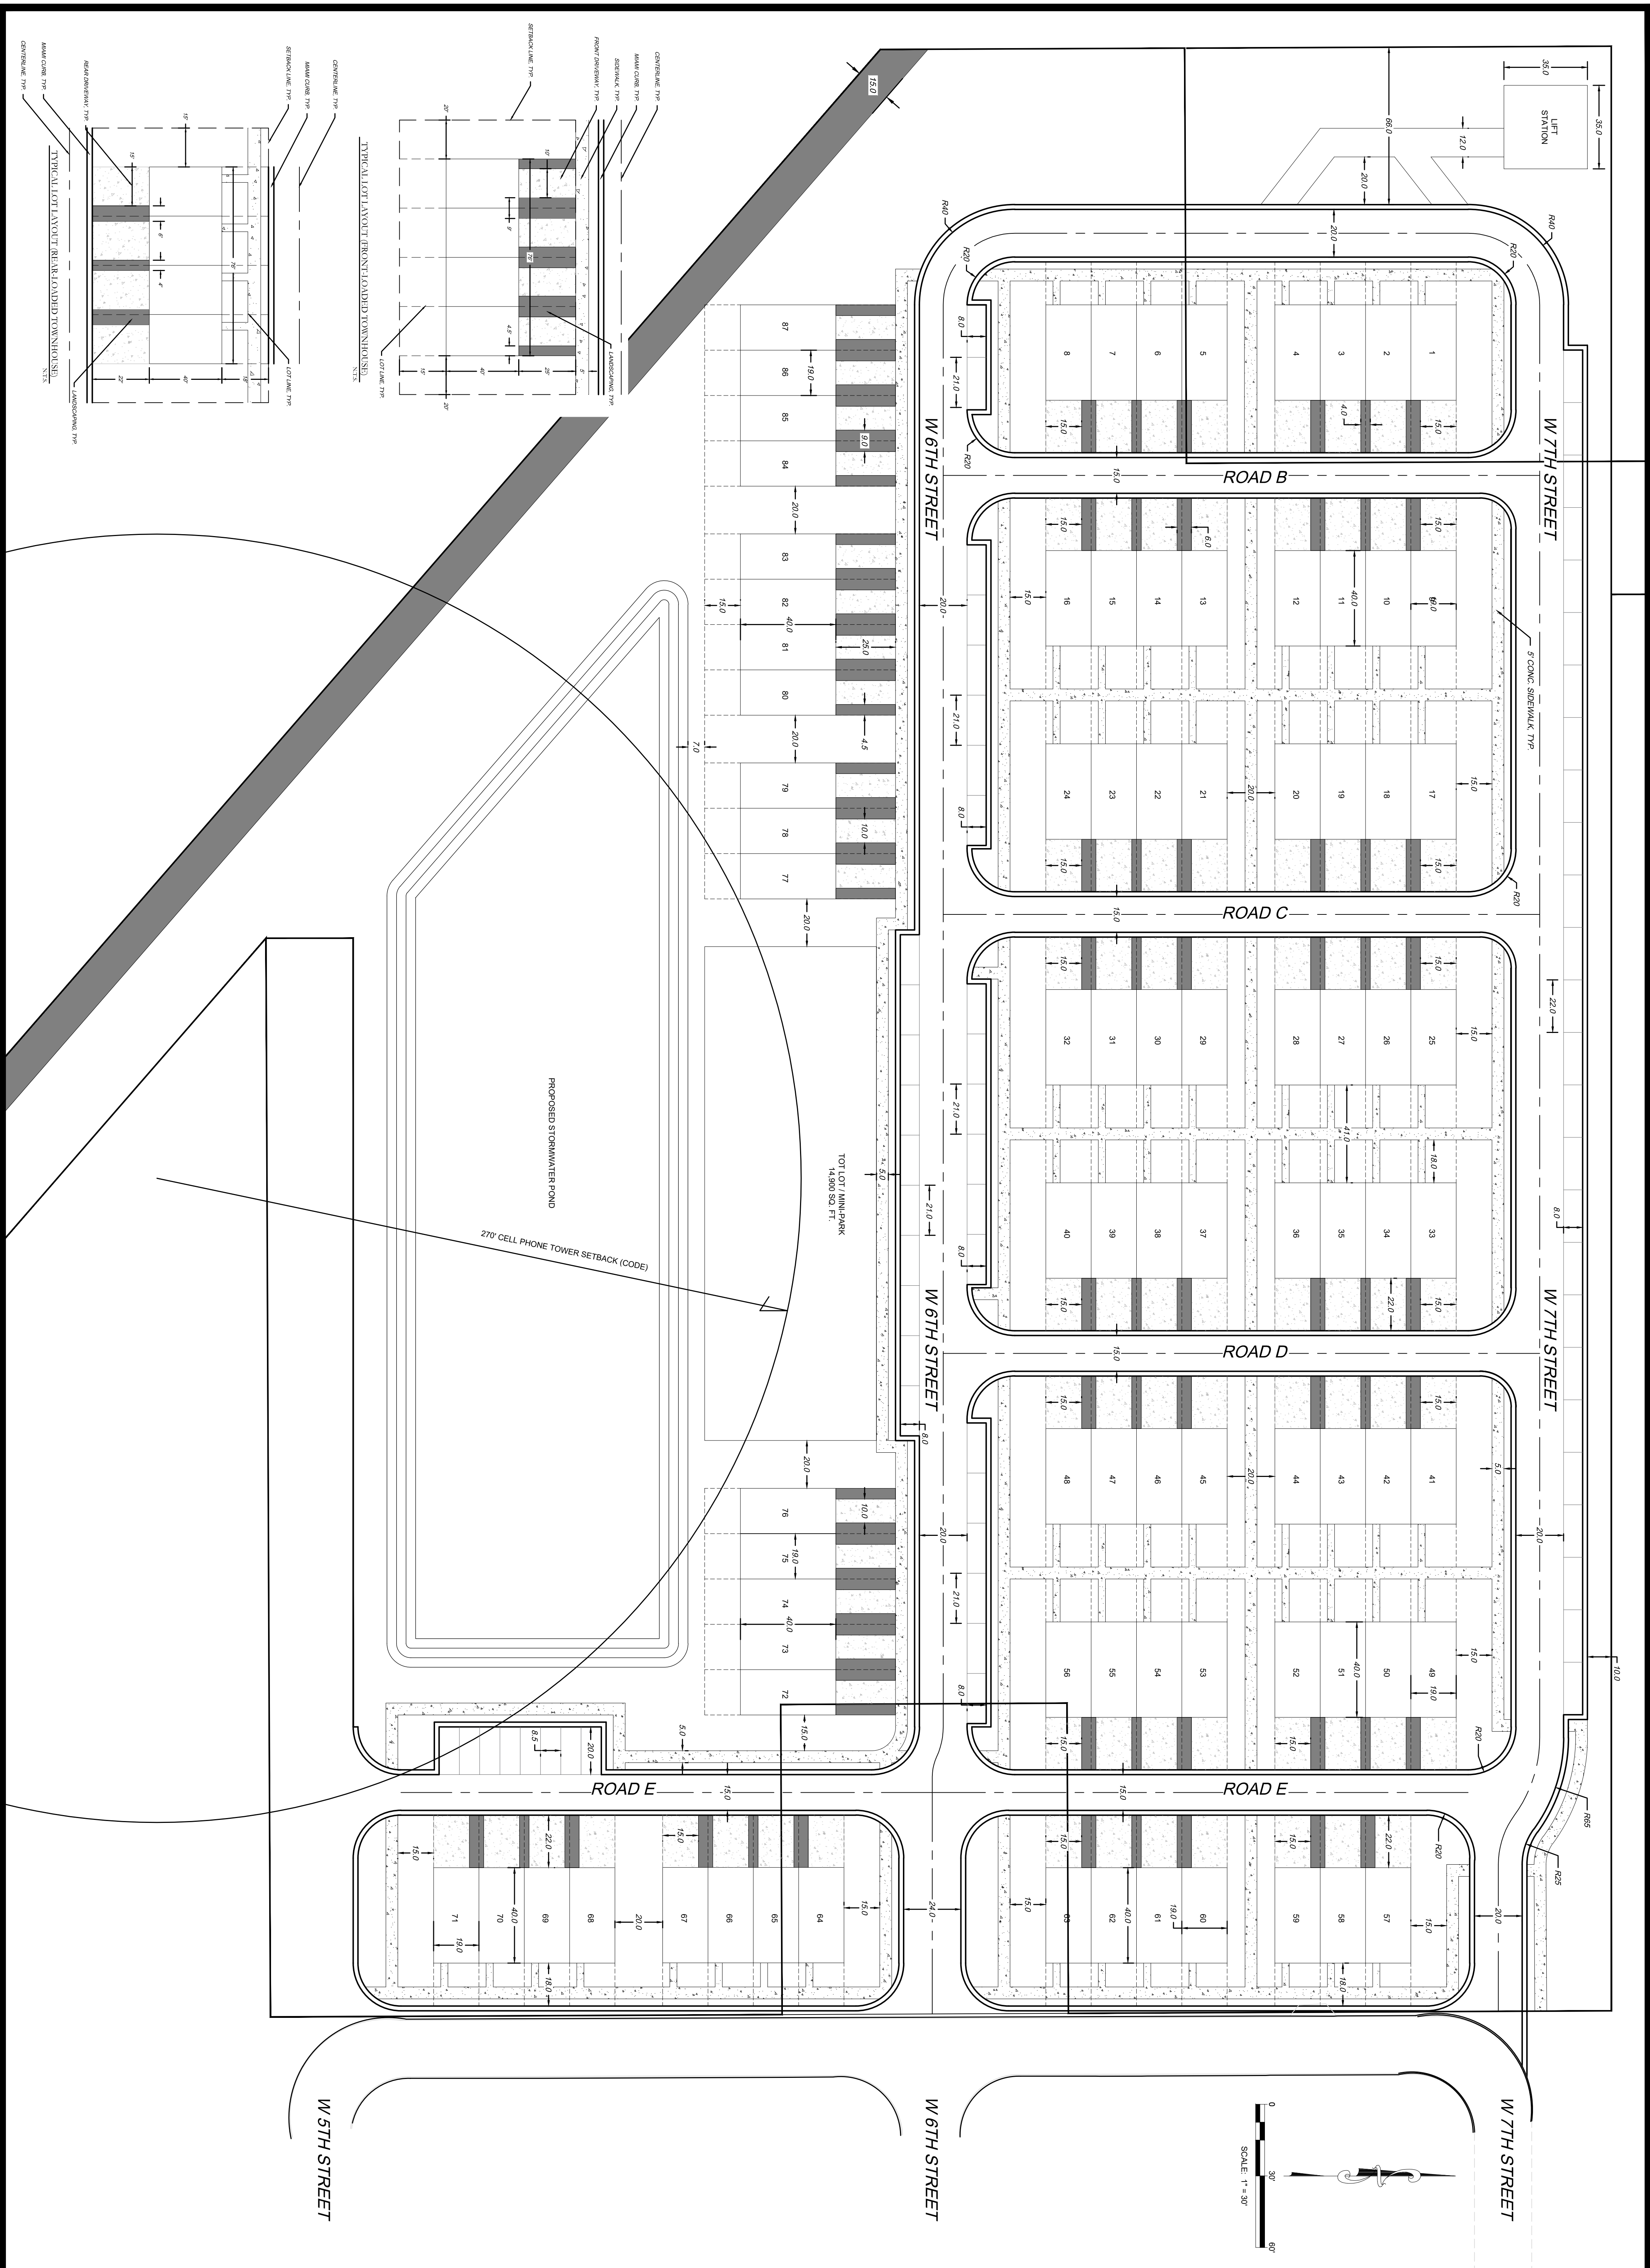

We hope the above provides adequate justification in support of this project and we appreciate the staff's review and prompt responses. Please do not hesitate to call me at 321-948-9594 or email me at vasu.consultancy@KarmaDevGrp.com if you have any questions or need any clarification.

Sincerely,
