

## Question 2 Response: Cameras

**14 respondents mentioned this solution.**

**100.00% were for using cameras, and 0.00% were against this solution.**

| For   | Against         |                    |  |
|---|-----------------|--------------------|--|
| Police presence. Cameras?   |                 |                    |  |
| Set up cameras and levy heavy fines of inattentive drivers.   |                 |                    |  |
| Speed bumps, street cameras, police presence, flashing signs stating what the speed is, and what the drivers speed is...  |                 |                    |  |
| Signs saying Caution: birds crossing (or similar). Stop signs - at least 3 around the lake to slow traffic.<br>Cameras to identify drivers who drive too fast, or who deliberately hit the birds.   |                 |                    |  |
| Have police hand out tickets for not stopping at stop signs, texting, and/or speeding. Add cameras that do the same thing.  |                 |                    |  |
| Consequences....Have LPD ticket for speeding or incomplete stops for a period of 30 days and have some type of camera to see what is actually happening around Lake Morton.   |                 |                    |  |
| Signs. Cameras.   |                 |                    |  |
| Cameras and police  |                 |                    |  |
| Pedestrian crosswalks with flashing lights, security cameras, law enforcement giving tickets.   |                 |                    |  |
| Cell phones are the biggest issue for distraction. put up cameras and ticket those with a cell phone in their hands   |                 |                    |  |
| Cameras to catch the people who hit the swans. People drive more carefully when they know they will be caught.  |                 |                    |  |
| Cameras to monitor the area, like traffic cameras. People are growing more and more considerate to others let alone animals and it is very sad. I see a lot of speeders on a daily basis.   |                 |                    |  |
| This is a tough one. Place a couple of cameras around the lake and then look at the film and send warnings to those who are using their phones or who are making turns when they shouldn't be or any other infraction. Not sure that this would work, but it's a suggestion. Good luck. |                 |                    |  |
| Put up traffic cams, use the internet and tv to communicate new laws to public.   |                 |                    |  |
| <b>Sub Total</b>  | <b>For = 14</b> | <b>Against = 0</b> |  |
| <b>Grand Total</b>  | <b>14</b>       |                    |  |
