

## Question 2 Response: Lower Speed Limit

**18 respondents mentioned this solution.**

**100.00% were for lowering the speed limit, and 0.00% were against this solution.**

For	Against
Lower speed around the lake or block off part of the lake in areas so the traffic would not be able to circle the entire lake.	
10-15mph with police patrol	
Lower the speed limit, add speed humps, include automatic radar detectors that alert drivers to their speed.	
Provide clear signage at the road fronts accessing LMD notifying drivers that they are entering a protected Bird Sanctuary (I believe very few actually know that it IS indeed a bird sanctuary) & to reduce speeds to 20 mph with flashing lights as utilized in school zones.	
Lower speed limit, more signs saying to stop for swans and birds in the road. Signs when entering from side streets	
I feel as though lowering the speed and then strictly enforcing it intermittently would help get the word out that drivers around Lake Morton need to be focused.	
Lower speed limit, Mark a center line on the road. Perhaps put in some stop signs.	
Fine them double ,,make speed limit down to 15 mph,,,like a school zone with hazard lights going off like a motion detector	
Fine anyone who throws bread from their car (happens a lot, and attracts birds to the street). Put the radar speed things up quarterly. Reduce speed limit to 20 instead of 25 and write tickets.	
With a low speed limit, hopefully, drivers wishing to drive faster will pick a different route.	
The 25 m.p.h. speed limit is too fast for this area. Suggest 15. And enforce it!	
make it to where they are FORCED to slow down or even as far as stop.	
Lowering the speed limit should bring better attention and instead of making limit 20, place signage 18 MPH and have sm image of swans on sign. Many tourist areas post the odd limits to attract driver attention. We expect 20, 25, 55, 70; but not 18, 22, 68 etc.	
Speed bumps, lower speed limit	
Signage. The lowered speed limit is a good start.	
Add traffic calming and reduced speed limits to Lake Hollingsworth Drive PLEASE PLEASE PLEASE	

For	Against
<p>Traffic calming zones and Enforcement enforcement enforcement and reduction in speed limits. Current Speed limits are not enforced. it would be a victory for Lakeland if we could be considered pedestrian friendly both in Morton and Hollingsworth but the city refuses to take a serious look at making material and meaningful changes to these areas. These areas should be redesigned and traffic calming zones are key. The department though granting these refuses to allow it for various reasons. This issue of traffic calming is one That is a city wide request and concern of its citizens. Perhaps someone at the city can research the effective alternatives successfully implemented elsewhere ?</p>	
<p>Reduce the access to Lake Morton Drive by making it, in effect, local traffic only with parking for residents and sanctuary visitors. Speed around the sanctuary should be limited to 15 mph due to pedestrians and birds sharing the drive. Drivers' eyes will be directed toward the lake side as they make their way around if the direction for all traffic is counterclockwise and there is no oncoming traffic.</p>
