Some alternatives that can be considered in lieu of the standard requirements for solid waste pickup are as follows:

Curb side pickup approved yes/ no

Request approved / rejected by: _____

Solid Waste Manager

Date

Return to D'Aerial Reed, Community Development upon final decision.

Variance Considerations

1. Variances are issued only in hardship cases and in mainly in the downtown area where space is limited.
2. When variances are granted and other options are offered, the options offered may include conditions, which may not be included in the Land Development Regulations or the Engineering Standards Manual. By submitting a Variance Request the owner/developer acknowledges this by the action of requesting a variance.
3. When Curbside Pickup is approved as opposed to a dumpster, the property owner will be required to provide enclosures for the containers where the containers will be kept on non pickup days and not be visible from the street.
4. The methods of pickup shall conform to current policies and operational practices currently available. Deviations, if this is approved as a variance may result in additional cost depending on individual requests.
5. An agreement will be required to be executed detailing the Approved Variance Request signed by the Solid Waste Manager prior to issuance of a Certificate of Occupancy. The Owner of the property will have to acknowledge the Variance Request and abide by its terms, provide a notarized signature on the Agreement, and will be bound by the terms of the agreement until such time as the agreement is terminated. Upon Termination, the site will be brought into compliance with the regulations in effect at that time. .
