

BIOLOGICAL SURVEY MAP

Work Starts Monday, March 11, 2024

The AECOM biological team will be working in the community starting on Monday, March 11, 2024. This biological survey for wetlands and protected wildlife and plants is being done to support the Lake Bonnet Drainage Project. Our efforts are scheduled to continue through approximately April 30, 2024.

During this time, AECOM biological team members will walk through, inspect, and photograph the area outlined in the map above. Please note, our team may enter and exit from the land and the water to complete the required data collection.
