Question 2 Response: Speed Bumps
22 respondents mentioned this solution.
95.45% were for speed bumps, and 4.55% were against this solution.

For	Against
Ya can't. We can't even get people to stop drinking and driving, or texting and driving. Everybody knows the rules. The speed limit and other regulations are very well posted. The only thing, I think could really make an impact is inverted speed bumps. Make them a depression instead of a rise.	I don't know if u can. I live on Luce road and we had a real problem with speeders. We put those raised bumps on the road and people still fly over them. The real problem is people looking at their phones and not paying attention. I don't know what the real answer is.
You can't educate drivers to pay more attention but you can install speed humps that enforce the desired outcome. You could also have a police presence.	
Speed bumps, street cameras, police presence, flashing signs stating what the speed is, and what the drivers speed is...	
They will pay attention to speed bumps when they feel it on their suspension systems or police officer speed traps in their wallets. I don't want our community to be like Tampa's Bayshore Blvd where people fly through there all the time. Like Lake Hollingsworth people walk around Lake Morton for fitness reasons because it's a beautiful place. Let's keep it safe for ourselves and the animals.	
Speed bumps.	
Sped bumps, lower speed limit	
You change their behavior by bringing in elements to make them pay attention to the road. Speed bumps or raised crosswalks are probably the best options.	
Speed bumps around the lakes would be a great way to make drivers, bikers, joggers and animals have a safer place for them and anyone who visits the lakes.	
Speed bumps ... People do what they want, not what they are told. Install the speed bumps!	
Speed Humps will do much more than trying to "educate" those drivers who just don't care !!	
Make the road bumpy to slow drivers.	
I think speed humps or just plain bumps would get their attention. It maybe excessive but it calls for drastic measures. And post a police officer their. The wildlife cannot protect themselves so it is the cities responsibility to do so. If it's a little drastic so be it.	
Lower the speed limit, add speed humps, include automatic radar detectors that alert drivers to their speed.	
Flashing lights, speed humps	
all of the things i stated above. the lake needs flashing lights and speed bumps or human being's directing traffic.	
Flashing lights, more speed bumps and more tickets being issued.	

For	Against
Flashing lights, speed bumps, setting up a few speed traps off and on etc.	
I think that using your phone and driving is a big problem in todays society. First, i think it needs to be more talked about and taught about more. On top of that, adding speed bumps or raised crosswalks will also help those driving to pay attention to the road in front of them.	
Flashing beacons/signage around the lake with speed limit. Raised walkways/speed bumps 5x around the lake	
Post swan crossing signs around town. (I've never seen one if there even are any) People will see these and realize they probably should pay attention or they will hit these creatures. Do something on social media like create a profile photo frame for protecting the swans and our citizens. Get people thinking even before they get behind the wheel. Other than that all you can do is create obstacles like round abouts and speed bumps to get people to slow down.	
After they pay a fine or two they will take notice and obey or know they have to pay. This is only on one small section of the lake. I know many more have been killed near Crystal Lake . Speed bumps are annoying but if they save lives it is so worth it. Please post LPD officers more often to write tickets. Have officers at various times of the day and night, random times. Word will get out.
